

Dalal Eghbaria

Software Developer: Full-Stack Development | Backend Engineering

 dalal.eg@campus.technion.ac.il  <https://linkedin.com/in/dalal-eghbaria-a9283820a>  <https://github.com/dalalEg>
 Portfolio:

PROFESSIONAL SUMMARY

Computer Science graduate from the Technion – Israel Institute of Technology with experience developing full-stack web applications using React, Django REST Framework, PostgreSQL, and Docker. Passionate about designing scalable software, developing RESTful APIs, and building reliable, user-focused systems. Strong foundation in software engineering principles, algorithms, databases, operating systems, and modern development workflows.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, C, SQL

Frontend: React, HTML5, CSS3, Bootstrap, Axios, React Router

Backend: Django, Django REST Framework, REST APIs

Databases: PostgreSQL, SQLite

Tools & Technologies: Git, GitHub, Docker, GitHub Actions, Redis, Celery, Linux

PROFESSIONAL EXPERIENCE

AI Training Engineer

Scale AI (Remote)

Nov 2024 – Jan 2025

- Evaluated AI-generated code and technical responses across multiple programming languages.
- Improved model quality by providing structured technical feedback and identifying logical, implementation, and performance issues.
- Worked with Python, C++, JavaScript, software engineering concepts, algorithms, and debugging tasks.

PROJECTS

Movie Theater Booking System

React • Django REST Framework • PostgreSQL • Redis • Celery • Docker

Designed and developed a production-style full-stack movie booking platform supporting user authentication, movie browsing, interactive seat selection, booking management, reviews, watchlists, notifications, and administrative analytics.

Highlights

- Designed and implemented RESTful APIs using Django REST Framework.
- Built an interactive seat reservation workflow with server-side validation to prevent double booking.
- Automated notifications and booking lifecycle tasks using Celery and Redis.
- Containerized the application using Docker Compose.
- Implemented CI workflows with GitHub Actions.
- Deployed the frontend on Netlify and backend services on Render.

Robotic Maze Solver (Coding Minion)

C++ • ESP32 • Embedded Systems

Developed an autonomous robot capable of navigating mazes using sensor input, barcode-based programming, and embedded control logic.

Highlights

- Implemented navigation algorithms and wall-following behavior.
- Integrated sensors, motors, LEDs, and buzzer for autonomous operation.
- Designed modular firmware for hardware testing and control.

CS50 Social Network

Django • JavaScript • Bootstrap

Built a social networking platform supporting authentication, following users, asynchronous interactions, editable posts, likes, comments, search, and paginated feeds.

EDUCATION AND CERTIFICATIONS

Technion – Israel Institute of Technology

Bachelor of Science in Computer Science

Relevant Coursework: Operating Systems, Computer Networks, Network Security, Artificial Intelligence, Data Structures & Algorithms, Database Systems

CS50's Web Programming with Python and JavaScript -Harvard University (edX)

LANGUAGES

- Arabic — Native
- Hebrew — Fluent
- English — Fluent
